

Model:	Omnia
Version:	V1.065ST/V1.065GD
Issue date:	16 th Dec 2026
Type:	Public

New Features

Fixes

Fix the audio break bug after adjusting the volume when playing hi-res audio.

Additional information

Please check the version in Omnia Menu options.

If the version number with GD, please use V1.065GD, and use V1.065ST if the previous version number is without GD.

Update instruction

1. Switch off the power supply of the Omnia (rear panel mains switch)
2. Un-zip and copy the correct Omnia folder to a FAT32 formatted USB drive root (file name must be 'Omnia' and must include Omnia.bin)
3. Insert the USB drive into the 'UPDATE' USB socket on the rear panel of the Omnia device.
4. Push and hold the front panel standby button.
5. Switch on power (rear panel mains switch) while continuing to hold the standby button.
6. Release the standby button, and the display will show 'upgrade processing'.
7. Allow the Omnia device to apply the software update. This may take a few seconds.
8. When the update is complete, the Omnia will be ready to use!

Change history

V1.064

1. Fix the unit playback freeze issue when decoding and displaying special letters or characters.
2. Fix the GD MCU standby power consumption issue.
